I am writing this letter in reference to Docket#98N-1038 titled "Irridation in the production, processing and handling of food." As a schoolteacher and a concerned mother I would seriously request that irradiated foods carry a PROMINENT DISCLOSURE, in easy to read type, in addition it is imperative that the terms "IRRIDATION" and "IRRADIATED" be visible on the front label along with the RADURA symbol. I believe strongly in the prominent disclosure of these items.

I will appreciate your serious attention to this matter,

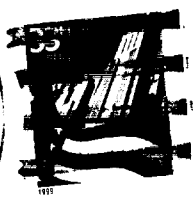

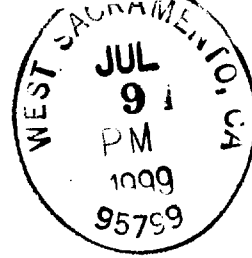

Sincerely- your constituent,

Janine Y. Carroll
